Dear Parent/Carer

### **University of Wolverhampton – Master the Mainframe Project**

We are pleased to inform you that your son/daughter has been invited to attend the University of Wolverhampton's Master the Mainframe Project on Friday 6<sup>th</sup> December. During the day, students will take part in a hands on workshop using the kind of specialist large scale computing technology that runs banks, airlines and major retailers, which will be different to what they may have experienced before!

Students will travel to and from the University of Wolverhampton by minibus accompanied by Bloxwich Academy staff. We will depart the academy at 8.30am and return at approximately 3.15pm. Students will then be responsible for making their own way home.

There is no charge for this visit and lunch will be provided although students may want to bring a drink with them for throughout the day.

Please complete the attached consent form and return to reception by Thursday 28th November 2019.

Yours sincerely
