'Be The Best You Can Be'

Dear Parents/Carers,

As you know, Maths is one of the three main pillars of a child's Primary education. It introduces children to concepts, skills and thinking strategies that are essential to everyday life and supports learning within other subjects across the curriculum. It helps children make sense of the numbers, patterns and shapes they see in the world around them, and makes a vital contribution to their development as successful learners.

We want to work with parents to ensure that our children are given every possible opportunity to embed and utilise the maths they learn in school, and to really appreciate and engage in this foundation subject.

On **Thursday 8th June at 9am** Mr. McFarland and Mrs. Martin will be holding a **KS2 Maths Focus Parent Workshop**. The aim of the workshop will be to provide parents with helpful ways to incorporate maths into day to day life, and to give you guidance and support as to how you can help improve your child's maths skills at home. There will be information about the specific aspects of maths that your child will learn during their educational journey, as well as signposting to useful resources you can use at home

The workshop will be held in the Lower Hall and entrance will be via the Library doors. Unfortunately, due to space, we are only able to allow entry to one parent per family.

We look forward to seeing you there!

Yours sincerely,

Ms S. Shepherd
Headteacher
