

Curriculum Intent: To create future Sociologists - pupils who interested in the world around them and are able to research society objectively. To develop their critical and analytical skills. To enable our pupils to stand up for equality, diversity and be culturally aware.

Curriculum Rationale: Pupils will learn the knowledge and skills to be able to understand different approaches to society including conflict and consensus views. The work of key classical sociologists Durkheim, Marx and Weber, different sociological perspectives on social structures, social processes and social issues will be developed throughout the course. This will enable pupils to develop invaluable knowledge to be more informed critical member of society
