

**Curriculum Intent:** In the geography department we strive to create global citizens who are knowledgeable enough to make informed decisions and confident enough to verbalise our own views coherently.

**Curriculum Rationale:** In the geography department we strive to create global citizens who are knowledgeable enough to make informed decisions and confident enough to verbalise our own views coherently. The geography curriculum allows us to investigate the world around us by looking at different places, cultures, and landscapes. We can consider our own place in the world, giving us the opportunity to become global citizens and gets us ready to apply our knowledge to our future lives.

**What makes the Bloxwich experience unique:** You will visit a range of different locations to experience and explore what we have been learning, such as rivers, coastal locations (beaches) and regenerated cities. We aim to inspire pupils to consider and visit as many places as possible.
